

111 South Wacker

Dock Information

All contractors, tradesmen and delivery personnel will be required to check in with the security officer stationed at the dock and provide a valid form of identification for a freight elevator access card.

This freight elevator access card will allow restricted access to service person.

Lower Wacker Drive and Dock Clearances

The clearance for trucks entering Lower Wacker Drive is 13' feet.

Dock overhead clearance is 12' 6" inches. Trailer length restriction for trucks enter the dock is 33' feet. Trucks larger in length may pull alongside the dock during off hours, but will not be able to enter dock because of length restrictions.
